

Denya New Testament

The New Testaments Have Arrived!

1,000 copies of the Denya New Testament have arrived in the capital city Yaounde! When former project coordinator Pastor Besong heard this, he sent a short message to his people saying, "Good news. The Denya New Testaments have arrived. To God be the glory!" This has strongly motivated him to work all the harder on the preparatory activities towards the upcoming dedication event, even though he's without a salary.

- Thank the Lord that, in answer to prayer, the printed copies of the long-awaited Denya New Testament have reached their destination.
- Pray that God will use the New Testament to bring growth in the number of Denya believers and also to encourage holiness of life among those who profess to follow Christ.

Getting Ready for "D-Day"

The Denya community has been actively arranging for the big event of the dedication of the New Testament. Local church leaders together with the organizing committee, which Pastor Besong chairs, held meetings for the preparation of the formal dedication to take place on Saturday, December 18.

During their four meetings the church leaders and committee discussed: (1) the funding of the event, (2) how they'll mobilize the entire community for "D-day" and (3) how the church will promote the Scriptures among the people.

- Pray that the local churches will fulfill their commitment to making the dedication a memorable event.
- Pray for the organizing committee as they strive for a dedication celebration that will inspire the attendees to give God's Word first priority in their lives.
- Pray that no stone will be left unturned as the Lord's workers busy themselves with planning for a successful dedication and Scripture distribution afterwards.
- Pray that many people will use the Denya Scriptures in church and in their everyday lives.
- Pray that the former volunteers in the project will collaborate well with Pastor Besong in getting ready for the dedication.

- Location: Cameroon, Africa
- Number of Speakers: 20,000
- Year Project Began: 1998
- Expected Completion Date: 2010
